

Checklist for Airport transfer search feature

Online travel platform

Author: Yevheniia Petrenko

AGODA Project

Agoda is an online travel platform that brings high-value and rewarding travel experiences to people all over the world through the Agoda website.

Introducing the Airport Transfer Search Feature Checklist, crafted through the utilization of Equivalence Classes and Boundary Values test design techniques. This comprehensive approach ensures the thorough validation of both permissible and impermissible values. Access the test data for validation at the following [link](#). Furthermore, the detailed test run report is available [here](#).
